DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 18 and 19 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The invention of claims 18 and 19 is drawn to a method of manufacturing a semiconductor device, with a separate classification from the examined claims, specifically 438/199+.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 18 and 19 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1 –3 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by US patent No. 6,455,894 to Matsumoto et al.

Matsumoto et al. teaches a semiconductor device (Fig. 9), comprising:

a substrate;
a source/drain diffused layer (6b, 6a) formed in the substrate for a transistor; and
a dummy diffused layer (6d, 6c) formed in the substrate;
wherein the source/drain diffused layer has its surface silicided (10b, 10a), and
wherein the dummy diffused layer has its surface partially covered with an anti-silicidation film (4c).

Regarding claim 2, Matsumoto et al. teaches a semiconductor device, wherein the anti-silicidation film is an oxide film.

Regarding claim 3, Matsumoto et al. teaches a semiconductor device, wherein a dopant, which has been introduced into the source/drain diffused layer, has not been introduced into the dummy diffused layer.

Regarding claim 14, Matsumoto et al. teaches a semiconductor device, wherein the dummy diffused layer is located between circuit blocks.

Allowable Subject Matter

4. Claims 4 – 13 and 15 – 17 are allowed.

Response to Arguments

5. Applicant's arguments with respect to claims 1 – 3 and 14 have been considered but are moot in view of the new ground(s) of rejection.
